DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Toft et al, newly cited.

The reference to Toft et al teaches the manufacture of a laminated material having a paper core with an intermediate layer of a blend of nylon-MXD6 and nylon PA6, and a heat-sealable layers comprising linear low density polyethylene, as herein recited and claimed. Note the Abstract, column 3 (lines 31-39), column 4 (lines 20-31), column 5 (lines 8-32) and column 6 (lines 18-36 and 45-64) for the broad concept. Note

column 7 (lines 4-45), column 7 (line 51) to column 8 (line 23) and column 8 (lines 47-56). Finally, note column 9 (lines 31-63).

The reference to Löfgren, cited of interest, teaches the manufacture of a paper-core laminate having a polyamide/ethylene-vinyl alcohol barrier layer, similar to that claimed herein. Note the Abstract, column 2 (lines 28-44), column 3 (lines 35-41) and Figures 1a-1c. The reference is not deemed to negate the patentability of the instant claims.
